## SUMMARY

I'm a **Senior Software Engineer** with **over six years** of experience in developing scalable, user-centric web applications, with a strong **focus on front-end development**. I specialize in building responsive, high-quality interfaces using **HTML**, **CSS**, **JavaScript**, and **React**, ensuring seamless performance across browsers and devices. My work emphasizes usability, accessibility, and clean design principles.

In addition to front-end expertise, I'm also experienced in back-end development with **C#** and **.NET 6+**, and proficient in working with **SQL Server** to design databases, write complex queries, and optimize performance. I take pride in writing clean, maintainable code and delivering intuitive digital experiences that align with both user needs and business goals.

**Focused technical skills in recent years include:**

- **Frontend:** Proficient in **React**, **Redux**, **JavaScript**, **HTML**, and **CSS**, **Next.js** framework,  with strong skills in both framework-based and vanilla JavaScript development.
- **Libraries UI**: Experienced in working with popular UI libraries including **Semantic UI**, **Ant Design**, and **Reactstrap**.
- **Backend:** Proficient in **C#** and **.NET 6+** for building scalable backends and **RESTful APIs**.
- **Database:** Strong in **SQL Server**, with hands-on experience in PostgreSQL.
- **Methodology: Microservices Architecture**, Agile Scrum
- **Others:** Teams work, Work independently,  **Power BI**, Problem-Solving, **Git**, GitLab, Jira...

## WORK EXPERIENCE

### Auvenir                                                    Mar 2022 - Present

*Senior Software Engineer*
Software company specializing in audit software outsourcing and in-house product development.

- *Key Contribution:*
  - Enhanced **UI/UX accessibility** for visually impaired users by integrating screen reader support, high-contrast modes, and keyboard shortcuts.
  - Built a **performance reporting module** by embedding **Power BI** into a ReactJS-based system.
  - **Integrated third-party libraries** such as **PDFKit**, **DevExpress**, and **Spreadsheet** components into ReactJS to support dynamic report generation, advanced UI interactions, and complex data handling within audit-related features.
  - **Collaborated** with PO, BA, and Designer during Sprint Planning to align on new feature ideas and product goals.
  - Participated in the migration process from **.NET 6 to .NET 8.**
  - Participated in performance evaluations across releases to **optimize system** efficiency and enhance **user experience**, **ensuring stable performance as user volume increased**.
  - **Guided new team members** through local environment setup for the project, ensuring smooth onboarding.
- *Key Techs:* ReactJS, Javascript, Semantic UI, SCSS .NET 8, SQL Server, Microservices.

## Logi Gear
**Mar 2021 - Mar 2022**

*Junior Fullstack Developer*

A tech company specializing in CRM solutions and automated software testing tools.

- *Key Contribution:*
  - Implemented new features based on requirements and resolved bugs during development
  - Led a project team of **4 members**, mentoring junior developers and recommending appropriate technologies and solutions.
  - **Break tasks** and conducted **code reviews** to ensure quality.
  - Worked with PO and BA during Sprint Planning to understand new features and project goals.
  - Supported **database design** and application development tasks as assigned.
- *Key Techs:* ReactJS, Redux, Next.js, Javascript, Reactstrap, SCSS .NET 8, SQL Server.

## Evizi
**Mar 2020 - Mar 2021**

*Junior Fullstack Developer*

Software company specializing in audit software outsourcing

- *Key Contribution:* Key Contribution: Analyzed requirements, implemented technical tasks, and wrote clean, testable code. Proposed performance improvements and migrated over 1M records with images from Caspio to Azure SQL Server.
- *Key Techs:* ReactJS, Redux, Next.js, Javascript, Reactstrap, SCSS .NET, SQL Server.

## Fujinet
**Jan 2019 - Mar 2020**

*Fresher Web Developer*

Fujinet is a software outsourcing company focused on the Japanese market.

- *Key Contribution:* Learned and implemented features under team lead guidance, followed development processes, wrote and reviewed code, and maintained the system.
- *Key Techs:* ReactJS, Javascript, Reactstrap, SCSS, .NET, SQL Server, Caspio.

## HIGHLIGHTED PROJECTS

**Auvenir:** *ReactJS, JS, Semantic UI, SCSS, .NET 6 , SQL Server, Microservices, PowberBI*     **Mar 2022 - Present**

- *Improved system responsiveness and stability across releases, enhancing user experience and directly contributing to increased product revenue.*
- *Implemented* **screen reader** *and* **keyboard navigation support**, *ensuring accurate and seamless use of the audit system for all users. Received positive client feedback*.
- Integrated **PDFKit**, **DevExpress**, and **Spreadsheet** into ReactJS, enabling complex audit features and significantly improving development efficiency and end-user experience.
- *Developed performance reporting to track audit progress and efficiency, increasing transparency and reducing process time by* **30%**.
- Quickly grasp complex feature logic and proactively review implementation to minimize bugs. Frequently entrusted by team leads with high-impact or technically challenging tasks.

**Beehive:** *ReactJS, Javascript, Ant Design UI, SCSS .NET 8, SQL Server, Microservices*     **Mar 2021 - Mar 2022**

- Developed a cross-platform **embeddable script** for partner websites to collect order data, enabling accurate commission tracking across platforms like WordPress, Shopify, and custom websites.
- *Collaborated closely with PO and BA to define and polish features upfront, reducing rework by* **40%** *and accelerating development cycles*.
- Improved overall product performance by **optimizing** frontend rendering, backend processing, and database queries, resulting in **faster load times, reduced server load**.
